DID WE MAKE MISTAKES?, YES, CONFESSED PM ATTAL

The Prime Minister concedes with humility that mistakes have been made in the past: "Did we make mistakes? YES "
"You have to have clarity, that's how I announced in Garonne the removal of the GNR tax, and I said stop with a simplification with the first 10 standards removed, and on the land and aid, everywhere we accelerate and frozen foods and last week we doubled the inspectors and controllers on prices for distributors who do not respect the EGALIM law.

IS THERE A FUTURE FOR OUR AGRICULTURE? PM GABRIEL ATTAL QUESTIONING, AS HE ANSWERED HIMSELF YES !
"Since 2017, we have created harvest insurance, and the EGALIM law to get out of the law, LME of 2009, the Varenne of water and in the face of climatic disasters, in the face of frost, storms, etc.
?The Egalim 1 law dates from 2018, the Egalim 2 law from 2021 and the Egalim 3 law (also called the Descrozaille law) from 2023. This Egalim law is the law "for the balance of commercial relations in the agricultural and a healthy and sustainable diet". The PM insisted on the importance of sovereignty, which must be based on the rural code, as fundamental in the nation.

GNR TAX (NRG, Non Road Gaz, Diesel) INCREASE IS ONE THOF THE FARMERS ANGER

Non-road diesel (NRG) is a red-colored fuel designed to power the engines of non-road vehicles, mainly in the agricultural and construction sectors. (Buildings, Public works) ...
The use of RNG became widespread in Europe after the implementation of a European directive intended to reduce greenhouse gas emissions. GNR is less polluting than conventional Diesel/Oil/Diesel fuel. However, the FAME that composes it makes it more prone to water conservation. It will retain water particles more easily and therefore has a shorter shelf life than other fuels. It is also less resistant to cold.
The planned increase in the taxation of non-road diesel (GNR), the fuel used in tractors, was one of the main reasons for the anger of farmers despite the concessions obtained to attenuate it by the main agricultural union of the country, the FNSEA.
FNSEA: National Federation of Agricultural Operators' Unions. It is the largest Union of French Farmers (there are around 300, 000 French Farmers)

?

On January 26, Gabriel Attal canceled the increase in the tax on non-road diesel (GNR) to try to appease the anger of farmers. Companies in the construction sector, major consumers of this fuel, are demanding similar treatment.

The PM continues: "We are going to include it in the Sovereign law, according to the rural code as fundamental in the nation.

We must take responsibility for helping our agriculture based on the French exception, that which allows us to produce.

PM Attal adds that he will oppose "all decreasing theses against the law of the jungle and the hazards that hit our agriculture in the face of climate change, ending that he wishes to "put an end to naivety and the arrival of rules Europeans."

Concerning the European Union's standards, seen as unfair and crushing by French farmers, PM Gabriel Attal responds "Europe must be protective and guarantor of sovereignty. While justifying itself in relation to the demands of farmers "We have made major progress, on fallow land the 10% of fallow land is imposed by the European Union, imposed by the CAP, (Common Agricultural Policy) of the CAP, defined in the European strategy "From farm to fork" and provided for this 10% of fall until in 2030. Gabriel Attal, ends with amine reassurance on the current discussion at the moment in Brussels about the Extraordinary European Summit, from the President of the republic, Emmanuel Macron, at the negotiating table on MERCOSUR. The timing is perfect to renegotiate the conditions of MERCOSUR, versus EU.
